Need emergency hydraulic repair?

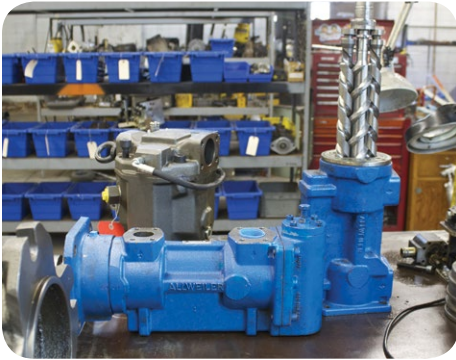

Call 864.233.7104 for 24/7 emergency services. We respond to every after-hours emergency call within one hour.

Predictive and preventive maintenance increase uptime and reduce maintenance costs

Cline hydraulic field services gives you **qualified inspection and diagnostic capabilities**, with documented recommendations to keep your hydraulic systems operating at peak levels.

- **Lower your maintenance costs** as you move from emergency repairs and unplanned downtime to planned services.
- **Reduce capital costs** by extending hydraulic system and component service life.

Hydraulic field services backed by deep inventories and in-house resources

We offer complete hydraulic cylinder rebuilds and maintain deep inventories of cylinder rebuild kits and fluid power components. Cline can reverse engineer legacy equipment no longer supported by OEMs and remanufacture parts and housings to **minimize your downtime**.

“Cline is a proven partner with the knowledge and skills to handle our on-site hydraulic repairs quickly and accurately. Evergreen has worked with the Cline team for years – they’re reliable and consistently meet or exceed our expectations.”

– Keith Cabe, Maintenance & Engineering Manager
